(202) 360-5474
WDC, 20009

Creative problem solver who is fueled by a passion for uncovering the truth in mystery.

Tenacious and unflagging in my pursuits, I don't stop until the work is done.

SKILLS

- HTML/CSS
- Git
- jQuery
- Ruby

- JavaScript
- Sinatra , Active Record
- React
- SQL , Postgres

- Rails
- Angular
- Agile Methodologies
- WordPress

RELEVANT EXPERIENCE

Enrolled in the Web Development Immersive program at General Assembly. Projects include:
- Simon - my version of the classic 80s game. Built using JavaScript.
- StoryDoc --an application that is designed to showcase work for documentary photographers. Built entirely in Rails.
- Weatro - this application provides real-time WMATA and weather data. Built using Rails and Angular.
- BookWorm - an application that provides DC residents with information about the city library system, as well as some book search functionality. Built in React.

OTHER SKILLS AND EXPERIENCE

I've spent over a decade in an environment that demands quick decision making, excellent multi-tasking, and a certain amount of self-confidence. I am able to successfully complete many tasks at once in a fast-paced environment, I have excellent verbal communication skills, and I am a skilled conversationalist. I keep calm under pressure, and I am very detail-oriented. In my most recent position, I was responsible for between $1500 and $2000 in cash per shift, as well as helping to supervise the waitstaff. I'm a self-starter and highly self-reliant. I work best in a results-driven environment, and I am quite comfortable being judged on the strength of my work.
